Science 277:1453-1474(1997).

-! FUNCTION: NOT KNOWN, REQUIRED FOR HIGH-TEMPERATURE GROWTH OF

E. COLI. IT IS POSSIBLE THAT HYPA PROTEIN SOMEHOW REGULATES BITHER

TRANSCRIPTION OF THE RPOH GENE OR THE ACTIVITY OF ITS GENE PRODUCT

SIGMA-32. PLAYS A ROLE OPPOSITE THAT OF DMAK, DMAJ, AND GRPE IN

TERMS OF HEAT SHOCK REGULATION, ANTAGONIZING THE NEGATIVE OF

THESS AND THUS FINE-TUNING THE HEAT SHOCK RESPONSE.

-! INDUCTION: By high Lemperatures.

-! CAUTION: It is uncertain whether Met-l or Met-36 is the initiator.

-! CAUTION: Ref.3 sequence differs from that shown due to a

Science 281:375-388(1998).
-!-FUNCTION: Involved in protein export. Interacts with the secY/secE
-!-FUNDUICN: SecA has a central role in coupling the hydrolysis of
ATP to the transfer of pre-secretory periplasmic and outer
membrane proteins across the membrane (By similarity).

-!- CATALYTIC ACTIVITY: 6-carboxyhexanoyl-CoA + L-alanine = 8-aminc-7-oxonoananaet + CoA + CO(2).

-!- COFACTOR: Pyridoxal phosphate (By similarity).

-!- COFACTOR: Pyridoxal phosphate; first step.

-!- PATHWAY: Biotin biosynthesis; first step.

-!- SIMILARITY: Belongs to class-II of pyridoxal-phosphate-dependent
                                                                                                                                                                                                                                                                 :::||| :::||| 525

Patent No. 6506893
GENERAL INFORMATION:
APPLICANT: BL.SOLH, NEVINE
TITLE OF INVENTION: POLYNUCLEOTIDES AND THEIR USE FOR DETECTING RESISTANCE
TITLE OF INVENTION: COMPOUNDS
TITLE OF INVENTION: COMPOUNDS
TITLE OF INVENTION: COMPOUNDS
TITLE OF INVENTION: COMPOUNDS
GURRENT APPLICATION NUMBER: US/09/446,301A
CURRENT PALICATION NUMBER: US/09/446,301A
SOURMER OF SEQ ID NOS: 51
SOURMER PATENTING DATE: 1999-12-20
NUMBER OF SEQ ID NOS: 51
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     82 GITTITGGTAAAGACGGCGAAAAAGACACAATGAAAAACTGACCAGCTCCATAGAATAC 141
